R.E.T.R (Remote Event Trigger Recording)

- When there's a motion or alarm event and Remote Event Trigger Recording is enabled, the event recording data will also be saved to the specified path on your PC at the same time.

Fully Remote Independent Operation

- Channel switching & video playback are fully independent from the local site, allowing supervisors to have private image monitoring remotely.

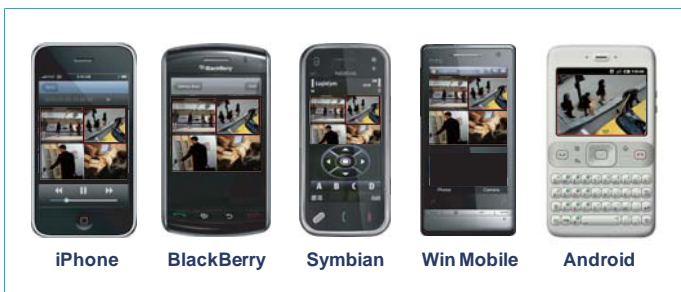

Independent Event-Triggered Recording

- With AVTECH's accurate event-triggered recording for single channel, users will not miss any important event and can have the maximized recording time. As for the other brand's DVR, its event-triggered recording accuracy is not satisfactory or even not supported, consuming a significant amount of hard disk space for event recording.

Powerful Mobile Surveillance Support

- Mobile surveillance via our self-developed and free program, "Eagle-Eye", is supported on many popular mobile platforms, such as iPhone, BlackBerry, WinCE, J2ME and Android.

H.264 Video Compression Technology

The Best Video Playback Quality

The recording picture quality is very similar to live image.

AVTECH H.264 DVR

OTHER H.264 DVR

► Long Recording Time

Compared with other brand's H.264 DVR, based on the same image quality level, the recording file size is 50% smaller, and the recording time is doubled.
